

**Libervia bridges emails to XMPP.** Much work has also been put into forums, and mailing lists can now be converted to XMPP forums!

Aug 2025 · [libervia.org](https://libervia.org)

**Slidge 0.3.0 and 0.3.1 make bridging to other IM networks much better.** Improvements include: emoji reaction fallbacks for older XMPP clients, many gateway-wide settings turned into user-level settings, a command for checking "preference" (in both adhoc and chatbot-style!) and support for pronouns in VCards.

Sep 2025 · [slidge.im](https://slidge.im)

**Convo v0.2.0 brings OMEMO encryption to KaiOS feature phones.** This is thanks to Converse.js, which Convo is based on, creating a headless version of its OMEMO plugin.

Sep 2025 · [convo.fsci.in](https://convo.fsci.in)

**XMPP Providers file makes a standard way to discover server parameters.** This helps create a master list of providers that clients can suggest when signing up for a new account. ejabberd added support for serving this XMPP Providers file in v25.08 via a new mod\_providers module.

Oct 2025 · [providers.xmpp.net](https://providers.xmpp.net)

**Movim releases v0.32 "Wilk".** One of the biggest releases ever made, it includes improvements in three major areas: instant messaging, social networking, and video conferencing

Nov 2025 · [movim.eu](https://movim.eu)

**Nine grants awarded by NLnet to XMPP projects in 2025.** The seven projects which received grants are: Kaidan, Dino, Libervia, ejabberd, Convo, Converse.js, and Macaw.

Nov 2025 · [nlnet.nl](https://nlnet.nl)

**Tor integration comes to Libervia.** This includes the possibility of federating with .onion domains.

Dec 2025 · [libervia.org](https://libervia.org)

**Gajim v2.0.0, sports a major redesign.** The entire user interface has now been migrated to use GTK 4.

Feb 2025 · [gajim.org](https://gajim.org)

**Dino v0.5 enables OMEMO encryption by default.** This update also includes improved file transfers, image preview and other file details before downloading, and two completely reworked dialogs.

Apr 2025 · [dino.im](https://dino.im)

**v0.30 "Encke" is the biggest Movim evolution in years.** Updates include multi-participant calls, reactions shown in the detailed message view, Unicode 15.1, plenty of new emojis and changing avatars when a contact publishes a new Story.

Apr 2025 · [movim.eu](https://movim.eu)

## Libervia proposes a standard for services to declare data policies.

The draft XEP and implementation allow servers to report details about aspects like storage, encryption, and legal jurisdiction.

Jun 2025 · [libervia.org](https://libervia.org)

## Simultaneous webcam and screen sharing lands in Movim v0.31 "Kameny".

Work on this was funded by NLnet.

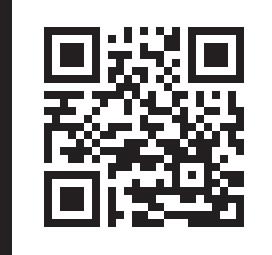

Jul 2025 · [movim.eu](https://movim.eu)

 **Conversations v2.19.3 upgrades connection security.** TLS 1.3 is required by default for all connections, though there is a setting to opt out.

Aug 2025 · [conversations.im](https://conversations.im)

 **Four major features land in Monocles Chat.** Namely: a new VCard editor that can share your profile as a simple business card via QR code; a chat overview calendar to easily jump to messages by date; as option to pin multiple messages for easy reference, and, last but not the least, a "User Tune" feature to broadcast which song you are currently listening to.
